September 13th Frontend Update

Created by Federico Ferracin

Updated on Sep 29, 2025

Tested and Logged by @Federico Ferracin Issue the Dropdown triangle looks distorted in extreme zooms 25%: stands out, very thick 500%: barely visible, too thin Upon zooming, sidebar disappears to different extents depending on scale of zoom in both microsoft Edge and google Chrome 500% Zoom 25% Zoom Suggestion Would the “...” edit dot button be better
