September 17th Update

Tested and Logged by @Federico Ferracin

Issue

- cannot change scales for new rows added
- restricted to 3 rows
- will auto revert back to 3 rows

Video

Fix

- @Federico Ferracin
- Attempting to add the new rows added into scope of UseScalePage
 - instead of only local to TableSection
- Pass onRowsChange to all the helper functions that handle:
 - add
 - delete
 - duplicate

The screenshot displays a web application interface. On the left is a sidebar with a dark blue background and white icons. It contains a search bar at the top, followed by a section titled 'Written Assessments' with a list of levels: LEVEL N (pink), LEVEL R-1 (orange), LEVEL R-2 (yellow), and LEVEL G (purple). Below this are sections for 'Coding Assessments', 'Oral Assessments', and 'Presentation Assessments'. The main area is titled 'Essay Template' and features a table with the following columns: General Learning or Assessment Tasks, AI Use Scale Level, Instruction to Students, Examples, AI Generated Content in Submission, AI Tools Used (version and link if available), Purpose and Usage, and Key Prompts Used (if any). The table contains three rows of data. At the bottom of the interface is a video player control bar with a play button, a 10-second rewind button, a 10-second fast forward button, a volume icon, and a progress bar showing 0:00 / 0:00 with a 1x speed indicator and a download icon.
