 [AI Use-scales](#)

 comp30022-ai-use-scale-2025-3b2430121090.herokuapp.com

Deployed on Heroku and AWS

- Configurations currently on:

 [Heroku](#)

 dashboard.heroku.com

- Guideline of **How to deploy to my own Heroku account?**

Method 1: Add as collaborator in current Heroku APP | transfer ownership

The screenshot shows the Heroku web interface for the app 'comp30022-ai-use-scale-2025'. The 'Access' tab is selected. A table lists one collaborator:

Collaborators	Role
federicof@student.unimelb.edu.au	owner

An 'Add collaborator' button is located in the top right corner of the table area.

Choice to add collaborator (Heroku Account)

Example: added collaborator

The screenshot shows the Heroku web interface for the app 'comp30022-ai-use-scale-2025'. The 'Access' tab is selected. A table lists two collaborators:

Collaborators	Role
fedeferra888@gmail.com	collaborator
federicof@student.unimelb.edu.au	owner

An edit icon is positioned next to the first collaborator's row.

Added a collaborator (For visual purposes only)

Can: transfer ownership

The screenshot shows the Heroku app settings interface. On the left, there's a 'Transfer Ownership' section with a link to learn more about transferring ownership to a personal account or team. Below it is a 'Maintenance Mode' section with a link to turn it on. On the right, there's a 'Choose app owner' section. A modal window is open, titled 'Choose app owner', showing a list of users. It includes a 'Current owner' section with 'Federico Ferracin (federicof@student.unimelb.edu.au)' and a 'Collaborators' section with 'fedeferra888@gmail.com'. A search bar at the top of the modal is labeled 'Filter owners'.

Transfer Ownership

Transfer this app to your personal account or a team you are a member of. [Learn more](#)

Maintenance Mode

If you need to take your app offline you can turn on maintenance mode. [More info](#)

Choose app owner

Federico Ferracin (federicof@student.unimelb.edu.au)

Filter owners

Current owner

Federico Ferracin (federicof@student.unimelb.edu.au)

Collaborators

fedeferra888@gmail.com

Delete App

Deleting your app and its add-ons is irreversible.

Delete app...

Transfer ownership to collaborator listed in the project

Method 2: Fork the Repository and install Heroku CLI and deploy to your own account

- Current costs: **Approx~ \$7/month**
- Will need to store personal Heroku account's API key inside **Github→Repository→Settings->Secrets and Variables→Actions**

The screenshot shows the GitHub repository settings for managing secrets and variables. The left sidebar has sections like General, Access, Collaborators, Moderation options, Code and automation (Branches, Tags, Rules, Actions, Models, Webhooks, Copilot, Environments, Codespaces, Pages), Security (Advanced Security, Deploy keys, Secrets and variables), Actions, Codespaces, and Dependabot. The 'Secrets and variables' section is currently selected. The main area is titled 'Actions secrets and variables'. It has tabs for 'Secrets' (selected) and 'Variables'. Under 'Environment secrets', it says 'This environment has no secrets.' and has a 'Manage environment secrets' button. Under 'Repository secrets', there is a table with one row: Name: HEROKU_API_KEY, Last updated: 2 weeks ago, with edit and delete icons. There is also a 'New repository secret' button.
