-

Client Feedback

- Looks good
- Want:
 - release this version
 - how do i know if this version was released
 - System should remember when this version was released
 - if it was first released to students
 - i can get feedback
 - and i can release again with changes
 - “All released version should be there”

- Version control
 - simple version history
 - this version i want to save it as a usable one
 - then i can create new versions and new releases
 - save as v1, v2, ...
 - can revert back to old versions
- Drag and Drop or change scale
 - Drag and Drop
 - most intuitive

To Do

- Create from scratch
 - Color save for cells
 - Admin
 - can create defaults
 - should need to create defaults (use scale entries)
-
