Update Log Sept 17
Tested and Logged by @Federico Ferracin

📅 **Date -** **Sep 17, 2025** 🕐 **Time - 21:53**

Scope Setup

Change Summary

- Merged Backend Changes

- **Summary:**
  - Add row
    - above
    - below
  - Delete Row
  - Duplicate Row
  - Routing
    - able to move between pages without needing to refresh and restart from login page
    - prevents "Click to go forward →" in browser to access next page without re-logging in
    - forces login
  - Change Scale

- can be changed by clicking the levels on the sidebar
  - Parsing data to the editing page is complete.
  - Parsing template title to the editing page is implemented
  - Editing title of template is implemented.
  - Searching for templates is implemented for the main screen
  - The table for subjects in the database is complete and is linked with the template table.

- **PR/Branch:** (earliest → recent)
  - `|Merge Dev to Backend (latest frontend components)`
    - SHA: `7719931f451a3276b12e64533b854b92a2e290a9`
  - `|Table fetching implemented`
    - SHA: `b35a4cdaded243501ba9d6003d8fc19ef30e0572`
  - `|Table loading, Search functionality, subject table,`
    - SHA: `c71d4b7b536365b22e2e35196b828265b3a24e1c`
  - `|Final rebase: resolved conflicts in TableSection.jsx`
    - SHA: `7d8d56a4f94d5f7fc50bc780b923e8873c0488e0`
  - `|And Federico's Local Changes (resolving conflicts)`

- **Type of change:**
  - ☑ CSS
  - ☐ Markup
  - ☐ Component Refactor
  - ☐ Clean up
  - ☑ New Features
  - ☑ Routing added

- **Affiliated areas:**
  - ☐ Base Template Section
    - ☐ Formatting

    - ☐ most visible buttons usable

Acceptance Criteria

- ☑ Flow in scope still works
  - ☑ Login → Template → AI Use Scale
- ☐ No unintended visual regressions at breakpoints (zoom in/out)
  - ☐ sidebar disappears ❌
- ☑ No 404s or redirecting problems

Test Matrix

OS	Browser	Widths (%)
Windows	Chrome	25% - 500%
Windows	Edge	25% - 500%

Data, Flags, Prerequisites

- **Accounts / fixtures :**
  - Admin account (default full access)
- **Feature Flags / env vars :**
  - None
- **3rd Party Deps :**
  - None

Risk Notes and Hotspots

☐ Unintended Visual Regression

☐ Able to close horizontal sidebar

Evidence & Logging

> ℹ Will contain:
> - Screenshots of workflow (ensure consistency)
> - Video of problem

Problems Found:

📄 **September 17th Update**

🔴 FF • Created by Federico Ferracin • Updated on Sep 29, 2025

Tested and Logged by @Federico Ferracin Issue cannot change scales for new rows added restricted to 3 rows will auto revert back to 3 rows Video Fix @Federico Ferracin Attempting to add the new rows added into scope of UseScalePage instead of only local to TableSection Pass onRowsChange to all the helper functions that handle: add delete duplicate
